DESCRIPTION

The D SERIES Distributed Design DS8 is a full-range, compact, two-way system, ideal for installations where space is a premium. Easily outperforming loudspeakers of a larger size format, the DS8 provides high power handling, high sensitivity and realistic sound reproduction. With a modern architectural appearance that aesthetically merges well in most environments, combined with weather-resistant capability suitable for indirect outdoor use, the DS8 can be used in a wide variety of speech and music applications. It is equipped with a built-in autoformer, allowing the full loudspeaker output to be realized with 70V or 100V distribution lines. A convenient front-accessible power tap switch is hidden behind a rotatable logo. Installation is simple and flexible using the included Infin-A-Ball™ multi-angle wall mounting bracket which allows low profile mounting and precise positioning of the enclosure over a broad tilt-swivel range.

ARCHITECTURAL SPECIFICATIONS

The loudspeaker system shall be a two-way, full-range compact system with an 8-inch low frequency transducer with patented Carbon Ring Cone Technology™ and a coaxially mounted 1.25-inch exit high frequency compression driver. The drivers shall be connected to an integral crossover with a crossover frequency of 1.3 kHz, with a self-resetting solid state circuit breaker for driver protection. The paintable enclosure shall be constructed of high-impact ABS plastic. The system shall have an amplitude response of 70 Hz to 20 kHz (+/- 4.3dB) and a low impedance (8 ohm) input capability of 35V RMS. The sensitivity at 1W/1m shall be 95 dB (125 Hz to 12.5 kHz, 1/3 octave bands). The loudspeaker system shall have a conical coverage pattern of 115 degrees from 500 Hz to 6 kHz. The nominal system impedance shall be 8 ohms (in low impedance setting). The system shall be equipped with a 120W high performance autoformer for use in 70.7V or 100V distributed audio systems, with 120W, 60W, 30W and 15W taps available in 70.7V distributed systems (120W, 60W and 30W taps available in 100V distributed systems). An easily accessible front-face tap selector switch located behind a rotatable logo shall be available for selecting autoformer and low impedance settings. Dimensions shall be 18.5 inches (470 mm) high, 9 inches (230 mm) wide and 10.1 inches (257 mm) deep, with a loudspeaker weight of 17.6 lbs (8 kg).
